

BLINKIT SALES ANALYSIS

Power BI Dashboard — Project Documentation

India's Last Minute App — Sales, Customer Satisfaction & Inventory Analysis

1. Project Overview

This project delivers an end-to-end Power BI dashboard analyzing Blinkit's sales performance, customer satisfaction, and inventory distribution. The dashboard consolidates key business metrics into a single interactive report, enabling stakeholders to explore sales trends across outlets, item categories, fat content, outlet size, and location.

1.1 Business Requirement

To conduct a comprehensive analysis of Blinkit's sales performance, customer satisfaction, and inventory distribution to identify key insights and opportunities for optimization using various KPIs and visualizations in Power BI.

1.2 Tools & Technology

- Microsoft Power BI Desktop — data modeling, DAX, and report development
- Power Query — data connection, transformation, and cleaning
- DAX (Data Analysis Expressions) — calculated measures and KPIs

2. Project Methodology

The project followed a structured, end-to-end BI development lifecycle:

- Requirement Gathering / Business Requirements
- Data Walkthrough
- Data Connection
- Data Cleaning / Quality Check
- Data Modeling
- Data Processing
- DAX Calculations
- Dashboard Layouting
- Charts Development and Formatting
- Dashboard / Report Development
- Insights Generation

3. KPI Requirements

Four core KPIs were defined to measure performance across the dataset:

KPI	Definition	Value on Dashboard
Total Sales	The overall revenue generated from all items sold.	\$1.20M
Average Sales	The average revenue per sale.	\$141
Number of Items	The total count of different items sold.	8,523
Average Rating	The average customer rating for items sold.	3.9

4. Chart & Visualization Requirements

Seven chart requirements were defined during the requirement-gathering phase, each mapped to a specific business objective and chart type:

#	Chart / Requirement	Chart Type	Objective
1	Total Sales by Fat Content	Donut Chart	Analyze the impact of fat content on total sales; assess how other KPIs vary with fat content.
2	Total Sales by Item Type	Bar Chart	Identify the performance of different item types in terms of total sales.
3	Fat Content by Outlet for Total Sales	Stacked Column Chart	Compare total sales across different outlets segmented by fat content.
4	Total Sales by Outlet Establishment	Line Chart	Evaluate how the age of outlet establishment influences total sales.
5	Sales by Outlet Size	Donut / Pie Chart	Analyze the correlation between outlet size and total sales.
6	Sales by Outlet Location	Bar Chart (Tier-wise)	Assess the geographic distribution of sales across different locations.
7	All Metrics by Outlet Type	Matrix / Table Card	Provide a comprehensive view of Total Sales, Avg Sales, No. of Items and Avg Rating by outlet type.

5. Dashboard Output

The completed dashboard was built to the specifications above. It presents a single-page executive view combining KPI cards, category breakdowns, and outlet-level detail, with slicers for Outlet Location Type, Outlet Size, and Item Type.

Figure 1: Blinkit Sales Analysis — Power BI Dashboard

5.1 Dashboard Components

- KPI cards: Total Sales, Avg Sales, No. of Items, Avg Rating
- Total Sales by Outlet Establishment Year (line chart)
- Total Sales by Item Fat Content (donut chart) and by Outlet Location Tier (stacked bar)
- Total Sales by Item Type (horizontal bar, ranked)
- Total Sales by Outlet Size (donut chart)
- Sum of Sales by Outlet Location Type — Tier 1/2/3 (bar chart)
- Outlet Type summary table — Total Sales, No. of Items, Avg Sales, Avg Rating, Item Visibility
- Slicers: Outlet Location Type, Outlet Size, Item Type

5.2 Key Metrics Snapshot

Overall performance figures shown on the dashboard:

- Total Sales: \$1.20M
- Average Sales per Item: \$141
- Number of Items Sold: 8,523
- Average Customer Rating: 3.9 / 5

5.3 Total Sales by Outlet Type

Outlet Type	Total Sales	No. of Items	Avg Sales	Avg Rating	Item Visibility
Supermarket Type1	\$787.55K	5,577	\$141	3.92	0.06
Grocery Store	\$151.94K	1,083	\$140	3.93	0.10
Supermarket Type2	\$131.48K	928	\$142	3.93	0.06
Supermarket Type3	\$130.71K	935	\$140	3.91	0.06

6. Key Insights

- Supermarket Type1 drives the majority of revenue (~\$787.55K, 5,577 items), far outperforming Grocery Stores and Supermarket Type2/3, which each contribute under \$152K.
- Fruits and Vegetables and Snack Foods are the top-selling item categories at \$0.18M each, followed by Household (\$0.14M) and Frozen Foods (\$0.12M).
- Regular fat content items outsell Low Fat items overall (\$776.32K vs \$425.3K).
- Tier 3 and Tier 2 locations account for the bulk of sales, together making up roughly 71.3% of total revenue, with Tier 1 contributing the smallest share.
- Medium-sized outlets generate the highest sales (\$507.90K), followed by Small (\$444.79K) and High (\$248.99K) — suggesting mid-sized formats perform best for Blinkit.
- Sales by outlet establishment year peaked around 2018 at \$0.20M, with most other years holding steady near \$0.13M.
- Average customer rating is consistently close to ~3.9–3.93 across all outlet types, indicating stable customer satisfaction regardless of format.

7. Conclusion

The Blinkit Sales Analysis dashboard successfully consolidates sales, inventory, and customer satisfaction data into a single, interactive Power BI report. It enables quick identification of top-performing outlet types, item categories, and location tiers, supporting data-driven decisions around inventory allocation, outlet expansion, and category management.
